

Business: Hicks Bay Drainage Limited

Client name

Edna Caldwell

A little about what you do

Hicks Bay Drainage (HBD) do roading and earthworks in Forestry and for Civil Contracts.

Client Insights

“What made you go ahead and start working with Health & Safety Tailored For You?”

A Health and Safety Inspector from Worksafe recommended Brad. Initially Brad came to do audio testing of all HBD’s older machinery. HBD found this to be an ideal opportunity for Health and Safety Tailored For You to help kick-start and update our sadly lacking work health and safety management and compliance.

“What impacts have you observed in your business as a result of our work together?”

HBD now have a tailored work health and safety management plan that all workers, management, and sub-contractors use everyday to assess and mitigate risk, with monthly audits across every area of day-to-day operations.

“What is one specific benefit you have taken away from working with us?”

Everyone is in this together, principles, contractors/employers, employees, Work Safe and Health and Safety Tailored for you. Ensuring **everyone** in the workplace is safe always.

“What do you anticipate will be the effect of our collaboration on your business over the next 12 months?”

We have worked together to become “SHE” qualified and Tokita approved to enable HBD to work for new contracts.

“What would you say to someone right now who was on the fence about working with us?”

Work H&S must never be procrastinated. Lives are on the line, so become proactive and work with Health and Safety Tailored For You.

“Speaking from the heart, is there anything you would like to say or add to anyone reading or watching this right now?”

Brad and his Business “Health and Safety Tailored for you” is readily available by phone, email, on the spot, he is your man! And worth the investment in Safety Services for all of your TEAM (TogetherEveryoneAchievesMore).
